Figure 1 shows various map symbols and their corresponding text labels. The symbols are arranged in two columns. The left column includes: Highway (solid line), Secondary Road (dashed line), Jeep Trail/Roadway/Ferry (dashed line with cross-ticks), Railroad (line with cross-ticks), Pipe/Power Line (line with cross-ticks), Ridge/Physical Feature (line with cross-ticks), Property/Fence Line (line with cross-ticks), Nonvisible Boundary (dotted line), Mobility (blue dashed line with dots), Inset (grey box), and Out Area (grey box). The right column includes: Stream/Shortline (blue line), Intermittent Stream (blue dashed line), River / Lake (blue wavy line), Glacier (blue wavy line with cross-ticks).

<sup>1</sup> A \* \* following a place name indicates that the place is coextensive with a MCD. A \* o indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>2</sup> This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or other reservation of the United States. It is a political subdivision of an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

<sup>3</sup> A \* \* \* following a block number indicates that the block number is repeated elsewhere in the block.
